

ED-270 Barometer Module: The ED-270 Barometer module is designed for use in meteorological and industrial measurement systems.

The barometer is housed in an 11-pin plug-in module that can be easily mounted on a DIN rail.

A 6mm hose connector is mounted on the front, allowing the measurement point to be extended outside the system enclosure or room where the module is installed..

TECHNICAL SPECIFICATIONS

Input			Power	
Measurement range	800 - 1100 hPa		Input voltage	12 - 24VDC
			Current consumption	<21mA (no load)
			Power consumption	<0,5W
Accuracy			Indications	
Temperature stability	+/- 0,5hPa (-10°C..+60°C)		Power	Green LED
Long-term stability	0,1%FSO/year			
Output			Other	
Voltage rangel	0 - 5VDC		Mounting	11P DIN-rail
			Working temperature	-40°C - +60°C
